

## Introductory Notes to the Pool kit Price Schedules

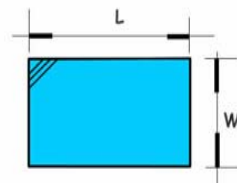

- The price for the Block Filter Unit is for an over the wall unit that eliminates all plumbing work and the cutting of any holes through the liner. This unit incorporates cartridge filters that need to be changed more frequently than the sand filter that is supplied with the basic kit
- The work content is estimated at 5 days for one person for the smallest pools increasing up to 20 days for the 12 x 6 x 1.5 metre pools. It should be easy to build a 6 x 3 x 1.2 m pool in a 14 day holiday and an 8 x 4 x 1.5 should also be achievable in the same time if you are very fit!
- The installation charge quoted for Bluepools installation includes for the removal of topsoil for pool installation and all the builders materials but excludes
  - The provision of power or water supply to the pool
  - Any landscaping
  - Decking or paneling to the pool sides
  - Attendance on site whilst the larger pools are filling with water
  - Any additional work or concrete required where the subsoil is of inadequate density or where groundwater is present
- The installation charge quoted for Bluepools installation assumes that accommodation will be provided on site for 1 week for pools up to 6 x 3 and for up to 2 weeks for larger pools
- The installation charge quoted for Bluepools installation assumes that storage for small tools and materials will be available on site as well as suitable water and electricity supplies and enough space to carry out the work
- 6 x 3 x 1.2 deep pools and those greater in size or depth require reinforcing bars in the foundations that must be at least 150 mm thick – the extra cost and complexity is small and full instructions are provided
